

Ceramic House Number Restoration

Have you lost your ceramic house numbers and want to replace them to the original look?
Are the lights on your numbers not working?
By a stroke of luck I found the original supplier and they are still in business.

Everlite Illuminated House Numbers can be contacted at 1-866-895-9172 (toll free) or
<http://www.everlite.us/parts.htm>.

You will want to order the **Heritage Series (smaller frame)**, Five digit house number
= 5 type S numbers.

Please specify the numbers you need.

The numbers are \$25.75 per set of 5 plus freight.

They have the screw in base bulbs #1487 for \$1.45 each. These are also available at Royal
Touch lamps down by Don Pepe's. By the way you can get free bulbs, if you send your old ones
back to Everlite, due to the lifetime warranty.

One can even get a new bulb socket from Everlite and the transformer.

Everlite is in Lake Geneva Wisconsin.

They have some other colors, if you want to order a whole new lighted house number that stays
looking like the original.

I spoke with Springer at Everlite. He says he has a brother in Tyler that often (weekly) reminds
him how nice the weather is in Texas, especially during the winter months.

Enjoy your restoration project. Mine should be finished shortly. I ordered the parts today (Feb
24, 2009)
